

### **AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings of claims in the application:

#### **Listing of Claims:**

Claims 14 - 34 (canceled)

Claim 35 (currently amended): A water-based crop protection composition of active compounds having foliar or systemic action, comprising:

- (a) at least one biscarbamate herbicide;
- (b) at least one inorganic adsorbent comprising a silicic acid;
- (c) at least one surfactant comprising an ethoxylated tridecanol having 5 to 13 ethoxy units; and
- (d) at least one auxiliary selected from the group consisting of: antifreeze agents, stabilizers, antifoams, wetting agents, dispersants, and carriers, wherein said wetting agents and dispersants are selected from the group consisting of: phosphated distyrenes, phosphated tristyrenes, lignin sulfonates, and mixtures thereof.

Claim 36 (currently amended): A water-based crop protection composition of active compounds having foliar or systemic action, comprising:

- (a) at least one biscarbamate herbicide;
- (b) at least one inorganic adsorbent comprising a silicic acid;
- (c) at least one surfactant comprising an ethoxylated tridecanol having 5 to 13 ethoxy units; and
- (d) at least one auxiliary selected from the group consisting of: antifreeze agents, stabilizers, antifoams, wetting agents, dispersants, and carriers, wherein said wetting agents and dispersants are selected from the group consisting of: ethoxylated tristyrenephphenol phosphates, sodium lignin sulfonates, potassium lignin sulfonates,

calcium lignin sulfonates, magnesium lignin sulfonates, zinc lignin sulfonates, ammonium lignin sulfonates, and mixtures thereof.

Claim 37 (previously presented): A crop protection composition of active compounds having foliar or systemic action, comprising:

- (a) at least one biscarbamate herbicide;
- (b) at least one inorganic adsorbent comprising a silicic acid;
- (c) at least one surfactant comprising an ethoxylated tridecanol having 5 to 13 ethoxy units; and
- (d) at least one active compound selected from the group consisting of: metamitron, and ethofumesate.

Claim 38 (previously presented): The crop protection composition according to claim 35 wherein said silicic acid is selected from the group consisting of: colloidal silicic acid (silica gel) and pyrogenic silicic acid (Aerosil).

Claim 39 (previously presented): The crop protection composition according to claim 38 wherein said silica gel has an  $\text{SiO}_2$  content of at least 95 % and a specific surface area of from 100 to 700  $\text{m}^2/\text{g}$ .

Claim 40 (previously presented): The crop protection composition according to claim 38 wherein said silica gel has a specific surface area of from 130 to 250  $\text{m}^2/\text{g}$ .

Claim 41 (previously presented): The crop protection composition according to claim 35 wherein the proportion of said at least one surfactant is in the range of 5 to 40 % by weight.

Claim 42 (previously presented): The crop protection composition according to claim 35, wherein the biscarbamate is selected from the group consisting of: phenmedipham, desmedipham, and a mixture of phenmedipham and desmedipham.

Claim 43 (previously presented): The crop protection composition according to claim 35 wherein the proportion of said at least one inorganic adsorbent is within the range of 0.5 to 25 % by weight.

Claim 44 (currently amended): The crop protection composition according to claim 35 wherein the proportion of said at least one inorganic adsorbent is within the range of 2.0 to 15.0 % by weight, and wherein the proportion of said at least one surfactant is within the range of 10 to 35 % by weight, and wherein the proportion of said herbicide is within the range of 5.0 to 75.0 % by weight.

Claim 45 (previously presented): The crop protection composition according to claim 35 wherein the active compounds and auxiliaries are finely ground and adjusted to a degree of fineness from 0.5 to 20  $\mu\text{m}$ .

Claim 46 (previously presented): The crop protection composition according to claim 45 wherein said active compounds and auxiliaries are adjusted to a degree of fineness of  $< 10 \mu\text{m}$ .

Claim 47 (new): A process for preparing a crop protection composition according to claim 35 wherein the active compounds and auxiliaries are finely ground and adjusted to a degree of fineness in the range of 0.5 to 20  $\mu\text{m}$ .

Claim 48 (previously presented): The process according to claim 47 wherein said active compounds and auxiliaries are finely ground and adjusted to a degree of fineness of  $< 10 \mu\text{m}$ .

Claim 49 (previously presented): The crop protection composition according to claim 36 wherein said silicic acid is selected from the group consisting of: colloidal silicic acid (silica gel) and pyrogenic silicic acid (Aerosil).

Claim 50 (previously presented): The crop protection composition according to claim 49 wherein said silica gel has an SiO<sub>2</sub> content of at least 95 % and a specific surface area of from 100 to 700 m<sup>2</sup>/g.

Claim 51 (previously presented): The crop protection composition according to claim 49 wherein said silica gel has a specific surface area of from 130 to 250 m<sup>2</sup>/g.

Claim 52 (previously presented): The crop protection composition according to claim 36 wherein the proportion of said at least one surfactant is in the range of 5 to 40 % by weight.

Claim 53 (previously presented): The crop protection composition according to claim 36, wherein the biscarbamate is selected from the group consisting of: phenmedipham, desmedipham, and a mixture of phenmedipham and desmedipham.

Claim 54 (previously presented): The crop protection composition according to claim 36 wherein the proportion of said at least one inorganic adsorbent is within the range of 0.5 to 25 % by weight.

Claim 55 (previously presented): The crop protection composition according to claim 36 wherein the proportion of said at least one inorganic adsorbent is within the range of 2.0 to 15.0 % by weight, and wherein the proportion of said surfactant is within the range of 10 to 35 % by weight, and wherein the proportion of said herbicide is within the range of 5.0 to 75.0 % by weight.

Claim 56 (previously presented): The crop protection composition according to claim 36 wherein the active compounds and auxiliaries are finely ground and adjusted to a degree of fineness from 0.5 to 20 µm.

Claim 57 (previously presented): The crop protection composition according to claim 56 wherein said active compounds and auxiliaries are adjusted to a degree of fineness of  $< 10 \mu\text{m}$ .

Claim 58 (previously presented): A process for preparing a crop protection composition according to claim 36 wherein the active compounds and auxiliaries are finely ground and adjusted to a degree of fineness in the range of 0.5 to  $20 \mu\text{m}$ .

Claim 59 (previously presented): The process according to claim 58 wherein said active compounds and auxiliaries are finely ground and adjusted to a degree of fineness of  $< 10 \mu\text{m}$ .

Claim 60 (previously presented): The crop protection composition according to claim 37 wherein said silicic acid is selected from the group consisting of: colloidal silicic acid (silica gel) and pyrogenic silicic acid (Aerosil).

Claim 61 (previously presented): The crop protection composition according to claim 60 wherein said silica gel has an  $\text{SiO}_2$  content of at least 95 % and a specific surface area of from 100 to  $700 \text{ m}^2/\text{g}$ .

Claim 62 (previously presented): The crop protection composition according to claim 60 wherein said silica gel has a specific surface area of from 130 to  $250 \text{ m}^2/\text{g}$ .

Claim 63 (previously presented): The crop protection composition according to claim 37 wherein the proportion of said at least one surfactant is in the range of 5 to 40 % by weight.

Claim 64 (previously presented): The crop protection composition according to claim 37, wherein the biscarbamate is selected from the group consisting of: phenmedipham, desmedipham, and a mixture of phenmedipham and desmedipham.

Claim 65 (previously presented): The crop protection composition according to claim 37, further comprising one or more auxiliaries selected from the group consisting of: antifreeze agents, stabilizers, antifoams, wetting agents, dispersants, and carriers.

Claim 66 (previously presented): The crop protection composition according to claim 37 wherein the proportion of said at least one inorganic adsorbent is within the range of 0.5 to 25 % by weight.

Claim 67 (previously presented): The crop protection composition according to claim 37 wherein the proportion of said at least one inorganic adsorbent is within the range of 2.0 to 15.0 % by weight, and wherein the proportion of said surfactant is within the range of 10 to 35 % by weight, and wherein the proportion of said herbicide is within the range of 5.0 to 75.0 % by weight.

Claim 68 (previously presented): The crop protection composition according to claim 37 wherein the active compounds and auxiliaries are finely ground and adjusted to a degree of fineness from 0.5 to 20  $\mu\text{m}$ .

Claim 69 (previously presented): The crop protection composition according to claim 68 wherein said active compounds and auxiliaries are adjusted to a degree of fineness of  $< 10 \mu\text{m}$ .

Claim 70 (previously presented): A process for preparing a crop protection composition according to claim 37 wherein the active compounds and auxiliaries are finely ground and adjusted to a degree of fineness in the range of 0.5 to 20  $\mu\text{m}$ .

Claim 71 (previously presented): The process according to claim 70 wherein said active compounds and auxiliaries are finely ground and adjusted to a degree of fineness of  $< 10 \mu\text{m}$ .
